EZ-Lift Application Examples

3.5 X Safety Factor above rated load capacity

- 6 sizes rated up to 6,600 lbs.
- With spreader bars 13,500 lbs.
- Safety Factor is 3-1/2 times rated capacity!

Use to setup CNC machining centers.

Use spreader bars for long, difficult round stock

Center magnet on most workpieces to lift.

Beveled bottom surface lifts round stock.

Eliminate straps, slings and associated dangers.

Locate magnet at balance point for lifting.

Use spreaderbars to gang stock in one operation

Vertical Lifters can be operated by one person.

Move round or rectangular stock vertically.

Spreader bars are used for long or very heavy loads.

We can test & re-certify your old lifters. Call us at: (800) 597-3921
